

“Wednesdays With A Master Gardener” Series

Welcome to this series of presentations on residential horticulture for the gardening public. We deliver topics of interest that are trending in Orange County plus breaking information on new garden pests.

This series occurs monthly on the third Wednesday of the month at 6:30 PM via the ZOOM platform and will continue through 2023 and beyond. Master Gardeners of Orange County will present some of our dynamic speakers talking about subjects they delight in sharing.

Coming Lecture:

May 17, 2023, at 6:30 p.m. “Channel Island Flora”

https://ucanr.zoom.us/meeting/register/tJEIfuuprT0vGdeHMH6B2B-zq_czs_jV-Xr8#/registration

California’s Channel Islands are home to nearly 800 different plant types, more than 280 of which are found nowhere else. Many of these developed in isolation from the mainland, over terrain ranging from woodlands and grasslands to chapparal and coastal sage scrub. Fourteen of the islands’ plants are federally listed as threatened or endangered species. Join us to get acquainted with some interesting and rare plants found on our own Channel Islands.

Free, open to the public-Registration Required
