

POINSETTIAS

WEDNESDAY, DEC. 13, 9-10:00 AM

Presented by
HB Surf City Gardeners
Community Center
18041 Golden West St
Huntington Beach, 92648

Did you know that the red parts are actually bracts (modified leaves) and that the true flowers are the little yellow parts in the centers? You can also plant them outdoors with protection from frost. They have been seen growing as tall as eight feet in San Jose, and taller in their native Mexico.

Learn from a Master Gardener of Orange County all about their origins, growing, and caring for this beautiful tropical plant, and get answers to popular questions:

***Are they really poisonous?
How do I get my plant to rebloom?
How to I keep them looking good throughout the holiday season?***

Free, and open to the public.

No Registration Required
